PROFESSIONAL PROFILE

+1 year of experience as software developer, I have worked on personal, freelance projects and as mobile developer. I excel in innovative functions, problem-solving, effective team communication, and adaptability to different environments. These skills enable me to provide significant value to your company.

LAST WORK EXPERIENCE

Mobile Developer

New york, USA
March 2024 - Present

Responsibilities:

- Identify and resolve existing errors, implementing new solutions that improve application performance and user experience.
- Collaborate with the design team to ensure the application's visual and functional alignment with the design specifications.
- Implement innovative solutions to improve application performance, optimizing loading times, memory usage and overall performance.
- Refactor the code of a complete application from scratch, improving the structure, organization and maintainability of the code.

Key Achievements:

- Ensured timely delivery of the application with all design features implemented as per specifications.
- Improved app loading speed by 30%, resulting in a better user experience and higher satisfaction.
- Completely refactoring the application improved code readability by 50%, making it easier to collaborate with other developers.
- Implemented more efficient design patterns and best practices to ensure long-term scalability and sustainability of the application.

SKILLS

- **Tech Skills:** CSS3, ReactJs, React Native, Firebase, NodeJs, ExpressJs, PostgreSQL, TypeScript, MongoDB

- **Languages:** English C1, Native Spanish

EDUCATION

Universidad Peruana de Ciencias Aplicadas(UPC)
Software Engineering

Lima, Perú
August 2024 - Present

LAST PERSONAL PROJECT

CLOSE-FRIENDS-API

June - July (2024)

I have created a robust API centered around social interaction. This API enables users to connect with friends, make posts, and efficiently explore their friends' posts intuitively and securely.

Key Features: Friend connections, Post management, Advanced validations, Email notifications

Stack: NodeJs, ExpressJs, Mongoose & MongoDB

Github: <https://github.com/MauricioAlonso28/POST-FRIENDS-API>
